Omoniyi Alimi

Product & Experience Designer

I turn complex systems into worlds people can find their way through.

Product and experience designer who designs and builds. For nine years I have made complicated things feel human, from a committee voting platform for the U.S. House to a portfolio built as a hand-made field notebook. I bring research with real people, a systems mind for keeping a visual world consistent, front-end skills to prototype in code, and accessibility practice rooted in designing for everyone who shows up. Now focused on interactive, experiential, and creative-technology work.

Selected Work

- omoniyialimi.com: a portfolio designed and coded as a world, with a notebook visual language, a hero that changes its story for each visitor, and ambient motion.
- LaunchKit UI: a UI kit I designed and launched, from brand and visual language to components and launch page.
- Wedding identity case study: creative direction for a wedding celebration, anchored by an original illustrated emblem that joins cowrie shells (Black American heritage) and pomegranates (Armenian heritage), designed to carry across menus, a custom newspaper, and keepsakes.
- U.S. House voting platform: translating the rules and rituals of legislative voting into an interface built for every House committee, in pilot with two when I left.

Experience

Omoniyi Studio & LaunchKit UI | Founder & Designer | Aug 2026 — Present

Independent practice • Product, brand & interactive work

- Designed and built omoniyialimi.com as a hand-made world: a field-notebook visual language, a persona-aware hero that rewrites its story for someone hiring vs. someone building, and ambient motion with a visitor-controlled pause.
- Created a wedding-identity case study for a boutique event-design studio: an original illustrated emblem in four colorways, eight décor and keepsake concepts, and tablescape direction.
- Designed and built client websites end-to-end, and a client portal shaped around how clients actually work with the studio, built with Claude and ChatGPT.
- Built a Claude skill that audits small-business websites against a conversion rubric, used in the studio's sales process.

Aretum | UI/UX Designer | Mar 2024 — Jul 2026

Library of Congress • Copyright System Modernization • Mar 2025 — Jul 2026

- Led discovery and research through interviews, journey mapping, and prototypes to redesign workflows for a system serving 100,000+ users and submissions.
- Mentored a designer on the search component, bringing her into the design system as we designed it together.

U.S. House of Representatives • Voting Platform • Mar 2024 — Mar 2025

- Led end-to-end design of a new committee voting platform for the U.S. House, turning an intricate legislative process into a clear, confident interaction built to scale across all committees.
- Built a 30+ component design system with documented states and behaviors that carried one consistent visual language across the product.

Coretec | UI/UX Developer | Dec 2022 — Aug 2023

USDA • Enterprise System Modernization

- Designed and coded a shared design system in Figma, Blazor, HTML, and CSS/SCSS, building the front-end components myself to keep design and build in sync.

Apex Systems | UI/UX Developer | Oct 2021 — Jan 2023

Athletico • Patient Onboarding & Scheduling

- Built the redesigned patient journey from registration to scheduling across desktop, tablet, and mobile, and usability-tested it with about 100 participants.

The Day Publishing | Front-End Designer & Developer | Dec 2018 — Oct 2021

Digital Experience Design

- Designed and built responsive web experiences for 35+ organizations, leading discovery, content strategy, visual design, and front-end build end to end.

Birthright Africa | Graphic Designer | Apr 2021 — Oct 2021

Cultural Engagement & Brand

- Designed visual systems, campaign assets, and web experiences for African diaspora engagement and cultural education, consistent across print, social, and digital.

Skills & Tools

Experience design: Interaction design, prototyping, world-building & narrative UX, journey mapping, multi-surface experiences

Visual: Visual systems, UI craft, typography, brand & graphic design, design systems as visual language

Build: HTML, CSS, JavaScript, React, Blazor, WordPress, Netlify, GitHub, AI-assisted building (Claude, ChatGPT)

Research & inclusion: Usability testing, interviews, inclusive and accessible design (WCAG 2.1 AA) for public audiences

Education

Florida State University • Bachelor of Social Work, 2016
BloomTech • Software Development, 2018
