Senior Product Designer who builds the systems products run on. Over nine years I have built and scaled design systems across three federal platforms, launched LaunchKit UI with Figma variables and tokens, and designed and shipped my own React site end-to-end. I build with AI as well as design for it: a Claude skill that audits websites for my studio's sales process, and a client portal I scoped and shipped with Claude and ChatGPT. I document components so engineering teams can ship them consistently, and I design accessibility into the system rather than onto the screens.

Career Highlights

- Built and scaled design systems across three federal platforms (House, Library of Congress, USDA), including 30+ USWDS components with tokens, states, and documentation.
- Designed and built a Claude skill that audits small-business websites against a conversion rubric and returns prioritized fixes, used in Omoniyi Studio's sales process.
- Designed and launched LaunchKit UI, a startup UI kit with a free community edition and a Pro tier: component architecture, Figma variables, tokens, and documentation.

Professional Experience

Omoniyi Studio & LaunchKit UI | Founder & Designer | Aug 2026 — Present

Independent practice • Product design, AI tooling & front-end build

- Scoped, designed, and built a client portal with Claude and ChatGPT, owning requirements, prioritization, and the client workflow end to end.
- Designed, built, and shipped omoniyialimi.com end-to-end: React front end, prerendered routes for search and link previews, accessible navigation, and GA4 funnel instrumentation.
- Designed and built client websites end-to-end for Omoniyi Studio, from discovery through launch.

Aretum | UI/UX Designer | Mar 2024 — Jul 2026

Library of Congress • Enterprise Copyright System Modernization • Mar 2025 — Jul 2026

- Expanded the platform design system with new components, design tokens, and documentation that set UI standards across the product.
- Mentored a designer on the search component, onboarding her into the design system's patterns and documentation as we designed it together.
- Led product discovery and UX research for the modernization of the Enterprise Copyright System, and designed permissions, user-management, and governance tools for 100,000+ users and submissions.
- Designed data-dense dashboards for the copyright system's operational data.

U.S. House of Representatives • Enterprise Voting Modernization • Mar 2024 — Mar 2025

- Built a USWDS-based design system of 30+ components with documented states, keyboard and focus behavior, tokens, and specs that became the foundation for future development.
- Led end-to-end design of a new committee voting platform for the U.S. House, including dashboards for committee vote data; designed for rollout to every committee, with two in pilot when I left.

Coretec | UI/UX Developer | Dec 2022 — Aug 2023

USDA National Agricultural Statistics Service • Enterprise System Modernization

- Designed and built a shared design system in Figma, Blazor, HTML, CSS/SCSS, and USWDS, standardizing patterns across multiple applications.
- Created reusable templates that accelerated development and improved consistency across the product ecosystem.

Apex Systems | UI/UX Developer | Oct 2021 — Jan 2023

Athletico • Patient Onboarding & Scheduling Platform

- Built the redesigned patient onboarding and scheduling experience for a multi-location healthcare provider across desktop, tablet, and mobile, working in Figma with the design system lead.
- Shipped accessibility CSS fixes through GitHub pull requests and code review with engineering.

The Day Publishing | Front-End Designer & Developer | Dec 2018 — Oct 2021

- Designed and built responsive web products for 35+ organizations across healthcare, nonprofit, education, and commercial sectors, from discovery through launch.

Skills & Tools

Systems: Design systems, component libraries, design tokens, Figma variables, USWDS, enterprise platforms, legacy modernization

Build & AI: Figma, FigJam, HTML, CSS, JavaScript, React, Blazor, GitHub (pull requests, code review), Netlify, Azure DevOps, Claude (skills), ChatGPT

Product: Product strategy, requirements & prioritization, UX research, information architecture, interaction design, dashboards, prototyping

Accessibility: WCAG 2.1 AA, Section 508, keyboard & focus design, accessible forms, WAVE, Accessibility Insights, NVDA, JAWS

Education

Florida State University • Bachelor of Social Work, 2016
BloomTech • Software Development, 2018
